

Paid Summer Internships

The Information Access Laboratory will be sponsoring a few summer internships for motivated university students with disabilities. Internships are full-time paid positions (part time positions may also be considered).

Positions will be available in areas of our research and development work, and or our educational outreach programs. **Everyone** is encouraged to apply, especially students interested in the fields of science, engineering, and math. All disciplines will be considered.

Interested students should apply by submitting a resume. There are two deadlines for which applications should be received: **April 9** and **April 30**. We urge students to apply early and reserve the right to grant internships at any time after the first deadline. Resumes should be sent to Anna Phalangas via email (ia-info@ee.udel.edu), fax (302-831-4316), or snail mail (Information Access Lab, University of Delaware / Department of EE and CIS, 208 Evans Hall, Newark DE 19716). For more information call 302-831-2485 or email ia-info@ee.udel.edu.
